

Pranav Kumar Soma

FORWARD DEPLOYED ENGINEER

prsama@ucsd.edu • github.com/soma-p • LinkedIn • pranavsoma.me • San Diego / SF Bay Area

EDUCATION

M.S. Computer Science, UC San Diego

Dec 2026 (expected)

GPA 4.00 • Jacobs School of Engineering • M.S. in 1.25 years

B.S. Computer Science, UC San Diego

Dec 2025

GPA 3.96 • Cum Laude, CSE Department Honors, Provost Honors (all quarters) • B.S. in 2 years

EXPERIENCE

Founding Software Engineer | Stealth Startup

Starting Sep 2026

Autonomous systems

- Building the **core operating system** plus the low-latency **C2 dashboards** that fold system telemetry into one **common operating picture** for operators
- Owning reliable comms for distributed edge nodes in **degraded environments**; deploying & triaging code **on physical hardware** with the hardware team via simulation and **hardware-in-the-loop** testing

Software Engineer Intern | ServiceNow

Summers 2025 & 2026

AI Voice Agents, IT Service Management • Technical Skills Award • top intern of 800+

- Owned end-to-end migration of the enterprise AI Voice Agents platform (AWS Lex V1→V2); **shipped to production & validated live with Disney+**, unblocking deployments for enterprise, military & university ITSM customers
- Re-architected the NLU pipeline across 8 intents • **45% lower AI Voice Agent latency**; built a dynamic post-incident “wrap-up” modal (UI + backend routing) for incident filing. **Return offer; invited back for a second summer**

AI Research Fellow & Agentic Systems Lead | Laboratory for Emerging Intelligence, UCSD

Apr 2025–Present

- Built & **deployed** a Python AI Tutor to 3 universities (UCSD, SDSU, Cal Poly Pomona) • **8,000 students / 8 courses, 64% fewer TA hours, 87% higher engagement** (A/B tested)
- Lead a **Teradata-funded** agentic-AI platform for 7,000+ users; custom **MCP servers** over UCSD APIs + a deterministic workflow executor, gathering requirements directly from staff & faculty stakeholders

Software Engineer Intern (Intern Lead) | Work4Flow

May–Dec 2024

- Ran requirements gathering & client outreach directly with customers, then led a 6-intern team to ship **GenAI Observer** (LLM prompt-evaluation) and a ServiceNow↔Smartsheet (SPM) integration **approved by the PM for customer deployment**
- Built customer-facing GenAI chatbots on ServiceNow CSM; ran developer-community enablement for the deploying teams

Engineering Manager | Triton Software Engineering (Spay.LA)

Sep 2024–Jun 2025

- Led 11 developers building a MERN fundraising & legislative platform for a live client • scoped requirements with stakeholders, owned delivery end-to-end; platform **raised \$75K** (spay.la)

SELECTED PROJECTS

- ORCA • AI Music Production** (*Best Project, SDTC: 1 of 30 from 200+; SAIRS 2025*) • full-stack app; OpenCV + neural source separation, CNN audio-to-score; **98% accuracy**. Flask, Docker, React
- Union Station Homeless Services** • shipped the listing platform used by one of greater LA's largest housing providers: media upload, validated intake, bulk exports built to their staff's workflow

LEADERSHIP

Co-Founder & President, Real World AI Network (2026–Present) • founded **7,000+ student** federation across UCSD's engineering, data-science & business schools driving AI research & entrepreneurship.

Founding Board Member & VP External Affairs, University AI Alliance • student-led frontier-tech network spanning MIT, Stanford, Caltech & Cornell; own external relationships with a16z speedrun, Bain Capital Ventures, Techstars & execs at Google and Meta.

President, CSE Society @ UCSD (200+ members, 21+ projects) • **Awards**: YC Startup School 2026, National Merit Finalist, USACO Silver.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, C, Swift, Kotlin, SQL, ARM-32 Assembly, HTML/CSS, Bash

Web & Full-Stack: React, Node.js, Express, FastAPI, Flask, Django & Django REST, MERN, Firebase, Google OAuth, REST APIs

Cloud, Systems & Data: AWS (Lex, Lambda), Docker, Git, Linux; MongoDB, PostgreSQL, MySQL; NumPy, Pandas, GeoPandas; parallel computing, distributed & real-time systems

ML & AI: PyTorch, TensorFlow, scikit-learn, XGBoost, OpenCV; LLM fine-tuning (LoRA, SFT, RLHF), RAG & GraphRAG, LLM agents & MCP, NLP/NLU, computer vision; Ollama, Qwen, Amazon Lex, Now Assist

Enterprise & Practices: ServiceNow (ITSM, CSM, SPM), UI Builder, Smartsheet; Agile/Scrum, system design, requirements gathering, on-site deployment; ROS, WPILib, embedded systems
